stream banks and surrounding area. These plants can create dense thickets outcompeting both native tree species and smaller ground flora.

Through removing the Snowberry we are able to create a more natural habitat and improve the habitat for water loving creatures such as water vole and brown trout.

If it's safe to do so there'll also be a chance to do a bit of basic surveying to identify vital invertebrates present in Lincolnshire's chalk streams.

Please wear suitable clothing such as long trousers, long sleeved top and waterproofs, just in case! Suitable footwear is essential, either sturdy walking boots or wellingtons. Please bring packed lunch and a drink.

No previous knowledge or experience needed, just your enthusiasm!

Get in touch for full details via Facebook, email william.bartle@lincolnshire.gov.uk or phone 01522 555783.

Our volunteer days are made possible through funding from WREN (<http://www.wren.org.uk/>)
